

### **Principal Investigator position(s)**

Temasek Life Sciences Laboratory (TLL) is seeking independent group leaders in microbiome research who will develop innovative and internationally recognized research programs within a highly supportive core-funded institute. Individuals employing multidisciplinary approaches and interested in bridging basic and applied sciences are especially encouraged to apply.

Successful candidates should have at least three years of postdoctoral experience and an outstanding publication record. Research areas are not limited to animal, human and/or plant host systems, but may also include abiotic environments.

TLL provides a conducive environment for outstanding science, with generous core funding, state-of-the-art facilities, and an intellectually stimulating and collegial atmosphere. Each appointment comes with full core-funded support for research costs, equipment and a number of funded positions. Qualified candidates will receive a comprehensive package including competitive salary, medical and other benefits.

Interested individuals should send their curriculum vitae, three reference letters and a detailed research proposal to:

Executive Director
